

MUNICIPAL NOTICE OF URGENCY

DUE OF DROUGHT

Lluís Enric Apesteguia Ripoll, as mayor of Deià, in accordance with Articles 21, 84 and 124 of Law 7/1985, of April 2, which regulates the rules of the local regime, and Article 41 of the Regulations of the Law on Local Regulations, I dictate this prohibition and

I LET YOU KNOW

That due to the severe drought we suffer, our water collection in the spring of "sa Font d'es Molí" and the "Pou d'es Verger" has been decreasing in a worrying way to the point that we need the contribution of a growing number of trucks daily.

The water supply at this time will be as usual until further notice.

However, to ensure this supply, from the date of publication, **the use of drinking water from the municipal network is prohibited for:**

- **Filling pools**
- **Wash cars, terraces, facades, etc....**
- **Watering gardens**

Similarly, abusive and unjustified consumption (from standard consumption per person per day) will be subject to sanction, and the meter could be temporarily removed.

For all this, we also ask you to carry out water saving measures, such as:

- *Wash fruits and vegetables in a bowl and use leftover water to water.*
- *Do not rinse dishes with the tap open but in the sink or with buckets.*
- *Use the dishwasher and washing machine at maximum load.*
- *Do not defrost food with water.*
- *Check that the faucets don't leak (a leak means wasting about 30 liters of water a day, i.e. more than 10,000 liters per year)*
- *Do not use the bathtub (200-300 liters), but the shower (30-80 liters), and cut off the water while one is soaped.*
- *Collect cold water while heating the shower, and then use it to scrub or water the plants.*
- *Close the faucet while brushing your teeth (an open faucet can consume more than 12 liters per minute).*
- *Pull the toilet chain only when necessary. Reduce the cubic volume of the toilet cistern by introducing a bottle of water or other object.*
- *If you have air conditioning in your home, you can collect the condensed water in a bowl and use it for watering (depending on the use you can deliver more than 10 liters per day).*

We appreciate your cooperation!

And this is made public for general knowledge,

In Deià, August 9, 2022

Lluís Enric Apesteguia Ripoll

Mayor of Deià
